Mike,

I just saw the breakdown notification for the control room shutdown last night. I have a few quick questions.

1. Breathe Cam around 7 – 7:30 PM last night does not appear to show any flares lit. Was any gas vented through the battery emergency flares? **There was no coke oven gas vented through any of the battery emergency flares.**
2. The initial report says there was a problem with No. 5 CR. Please verify the No. 1 and No. 2 CR were both operating during the entire breakdown of No. 5 CR or

indicate any time when either or both was shut down. **No. 1 and No. 2 Control Rooms were operating throughout the No. 5 Control Room Bypass.**

3. What, if any, measures (such as extended coking) were taken to mitigate emissions during the breakdown?

**Repairs were given top priority and due to the short duration, it was not necessary to extend coking times.**

Thanks,

**Gary Fischman**
