Gary,

There was no explosion or fire with this breakdown. B Battery flared for approximately 11 to 12 minutes per our Title V permit.

Thanks,  
Mike

---

Also, was there any flaring or any explosion or fire associated with this breakdown? Below is a snapshot from about 8:13 PM. The yellow lighting over B Battery continues for about 11 minutes. Could that have been from the No. 2 CR?

Slow

**Subject:** Breakdown 4011 - No 2 CR

Mike,

Breakdown Report 4011 was received on Tuesday, January 27, 2026 at 8:37 PM for the No. 2 Control Room, bypassing No. 5 CR. I just received notice that the breakdown ended 8:20 PM on Wednesday, January 28.

When you submit the follow-up report for this breakdown, please include calculations of plantwide average H<sub>2</sub>S content of coke oven gas for January 27 and January 28 for comparison with the 25-grain limit. Please include hourly plantwide average H<sub>2</sub>S concentrations with this calculation.

Thank you,

**Gary Fischman**
